

International Social Policy Comparative Analysis Presentation Guidelines

From the syllabus:

You may make a power point presentation based on your written document or other forms of presentation. If you require any technical assistance to present, please discuss this with me in advance. We may invite an expert guest to interact with students in the class and give comments on substantive areas of presentation. The guest judge's comments and feedback will not be part of your final grade.

Class, please fill out the following and submit this document via email. You will need to choose a theme, which is your paper topic. Under “speaker” provide your name and elect three panelists for your presentation among your colleagues in the classroom. Please ensure that your panelists are informed of their position and consent to being on your panel. It is my hope that every student in the class gets to serve on a panel in different roles.

Please sign up for a timeslot ASAP using the links below. Your final draft of the Comparative Analysis paper will be available on my website for easy access however, please make sure that you distribute it to your panelists beforehand so that they have time to prepare.
